

Through rigorous research and development Vacalon has built a line of waxes that covers the entire spectrum of dental work.

## PROLINE SCULPTURING WAXES

ProLine Sculpturing Waxes fuse together the best carving, modeling and handling characteristics to offer a wax of unequalled quality. Precise fitting wax patterns can be achieved due to the very low contraction factor, and technicians can control the viscosity for quick coverage or detailed build-up. ProLine Sculpturing Wax is manufactured from the finest raw materials, free of resins or ash, to guarantee a clean burnout without residue.

- Three different levels of firmness to suit every technician
- Very low shrinkage to allow for precision fabrication of wax patterns
- Firm and stable, but does not become brittle
- Easy to carve, resulting in sharp contours and anatomy
- Available in opaque colors to provide a deep contrast or to mask colors

## PROLINE SPECIALTY WAXES

Whatever your task, Vacalon ProLine Waxes have you covered. ProLine Margin Wax is the ultimate finishing touch to any wax-up, allowing the cervical area to be completely sealed. ProLine Milling Wax was developed to be extremely stable and tough, enabling technicians to achieve the highest levels of accuracy. Available in a bleached white shade and an ivory shade, ProLine Diagnostic Wax is a great choice for creating aesthetically pleasing presentation models.

## PROLINE STICKY WAXES

ProLine Sticky Waxes cover a wide range of applications, from model articulation to wax connections. Each sticky wax was designed with a certain task in mind, and differs slightly from the other sticky waxes.

- Multiple formulations to complete different tasks
- No residues that can contaminate wax patterns
- High stability when hardened to maintain dimensional accuracy

## PROLINE DIPPING WAXES

Vacalon's three different ProLine Dipping Waxes offer a complete range of characteristics to meet the demands of any technician. Formulated using the finest raw materials, ProLine Dipping Waxes do not contain resins or ash, allowing them to burn out cleanly.

- Copings are virtually crush resistant while maintaining dimensional accuracy
- Produces a smooth even coat that accurately replicates the details of the die
- No plastics, resins or other materials that make wax gummy and hard to work with
- Upon cooling the wax is easy to carve and does not become brittle
- Excess wax can easily be trimmed off, resulting in sharp and accurate margins
- Highly stable thanks to minimal shrinkage and contraction

### PROLINE SX SCULPTURING WAX

- Softest, most flexible of all ProLine Sculpturing Waxes
- Increased flexibility allows for easy cutting
- Melting point of 134° F (57° C)

Green – 75 gram tin	Item No. 41010	\$28.00
Ivory – 75 gram tin	Item No. 41011	\$28.00
Opaque Green – 75 gram tin	Item No. 41020	\$28.00

### PROLINE DX SCULPTURING WAX

- The ProLine Sculpturing Wax with medium firmness
- Excellent modeling characteristics make it the perfect choice for detailed anatomy
- Melting point of 138° F (59° C)

Blue – 75 gram tin	Item No. 41012	\$28.00
Opaque Blue – 75 gram tin	Item No. 41021	\$28.00
Opaque Gray – 75 gram tin	Item No. 41022	\$28.00

### PROLINE FX SCULPTURING WAX

- The firmest of all the ProLine Sculpturing Waxes, yet not brittle
- High strength and increased stability with excellent carving qualities
- Melting point of 140° F (60° C)

Red – 75 gram tin	Item No. 41013	\$28.00
Opaque Red – 75 gram tin	Item No. 41023	\$28.00

### PROLINE MILLING WAX

- Very hard wax, perfect for milling while keeping all the qualities of a high performance sculpturing wax
- Milling can be carried out without the wax smudging, smearing or sticking to burs
- Extremely stable and strong, allowing for milling to take place at a wide range of speeds
- Burs will create very small carvings, and milled wax will be smooth
- Melting point of 142° F (61° C)

Violet – 75 gram tin	Item No. 41014	\$28.00
----------------------	----------------	---------

### PROLINE MARGIN WAX

- Excellent carving characteristics, allowing technicians to create sharp margins
- Will not pull or flare, insuring accurate and precise castings
- Perfect amount of flexibility and elasticity
- Darker colors to contrast against sculpturing waxes

Blue – 75 gram tin	Item No. 41040	\$28.00
Red – 75 gram tin	Item No. 41041	\$28.00

### PROLINE DIAGNOSTIC WAX

- Colors closely replicate the true color of the final restoration
- Have the perfect level of opacity to easily block out colored die stones
- Excellent carving and modeling characteristics
- Very low shrinkage and high strength
- Bright White Diagnostic Wax is perfect to replicate today's bleached shades

Bright White – 75 gram tin	Item No. 41030	\$28.00
Ivory White – 75 gram tin	Item No. 41031	\$28.00

### PROLINE AX STICKY WAX

- Perfect for use when articulating models as it is very flexible and tough
- Ability to melt large amounts at one time without becoming stringy

Blue – 75 gram tin	Item No. 41050	\$28.00
--------------------	----------------	---------

### PROLINE GX STICKY WAX

- Acts like a "wax glue" perfect for positioning or making sprue connections
- Extremely tacky with low flexibility upon cooling

Pink – 75 gram tin	Item No. 41051	\$28.00
--------------------	----------------	---------

### PROLINE PX STICKY WAX

- All-purpose formula with a low melting temperature
- Works well for spruing, bridgework, model work and also for denture repairs

Yellow – 75 gram tin	Item No. 41052	\$28.00
----------------------	----------------	---------

### PROLINE CX STICKY WAX

- Connecting or former wax used to assemble bridge sections or seal around sprue connections
- High melting temperature with very low contraction and minimal shrinkage allow it to be used for many different tasks

Green – 75 gram tin	Item No. 41054	\$28.00
---------------------	----------------	---------

### PROLINE HX DIPPING WAX

- Flexible dipping wax with the ideal amount of elasticity
- Perfect viscosity without being gummy

Purple – 250 grams	Item No. 41000	\$52.00
--------------------	----------------	---------

### PROLINE MX DIPPING WAX

- Medium flexibility dipping wax with excellent handling characteristics
- Copings can be removed from the die with consummate ease

Orange – 250 grams	Item No. 41001	\$52.00
--------------------	----------------	---------

### PROLINE LX DIPPING WAX

- Increased rigidity for optimum carving and scraping characteristics
- Perfect as a basecoat for inlays, onlays and full contour wax patterns

Green – 250 grams	Item No. 41002	\$52.00
-------------------	----------------	---------
