

# QUICKCHECK GOLF

## INSTRUCTIONS

Quickcheck can be used on any club – irons, wedges, drivers and putters.

Available in red, green and white.

## How to check Club Face Impact

### STEP 1

Shake can well, holding can 1-3 inches from the club spray an even coat of Quickcheck onto the club face.

### STEP 2

Hit the ball taking a normal swing with your iron, driver, wedge or putter.

### STEP 3

Review the club face and the impact area will be clearly visible.

### STEP 4

Remove spray with towel or club cleaning brush. Reapply and repeat process as needed.

## How to Check Club Sole Impact

Checking club sole impact works best when hitting off of a mat. **Step 1:** Shake can well, holding can 1-3 inches from the club spray an even coat of Quickcheck onto the club sole. **Step 2:** Hit ball taking a normal swing. **Step 3:** Review the sole of the club to see what part of the sole impacts the mat first. This will reveal the club head orientation at or prior to impact. **Step 4:** Remove spray with towel or club cleaning brush. Reapply and repeat process as needed.
